We divided the work as evenly as we could for the entire project. We came to the following work division :

1. Jesse - Navigation Bar, Home Page, Project Skeleton.
2. Butch - About Page, Menu Page, User Research
3. Claire - Gallery Page, Order Page, and Finishing Touches.

For general fixes, CSS consolidation, and other issues, we all worked together to solve. For the work process, we tried to pass off work to keep our theme and CSS consistent. First Jesse worked on the Navigation bar, Home page, and basic file skeleton to start things off. Butch worked on the About page, Menu Page, and further refined the overall look and theme. Claire then started the Gallery page, Order page, and other fixes based off of Butch's files.
